ECOCOMFORT PLUS

DECENTRALIZED WIRELESS HEAT RECOVERY UNIT

ECOCOMFORT PLUS

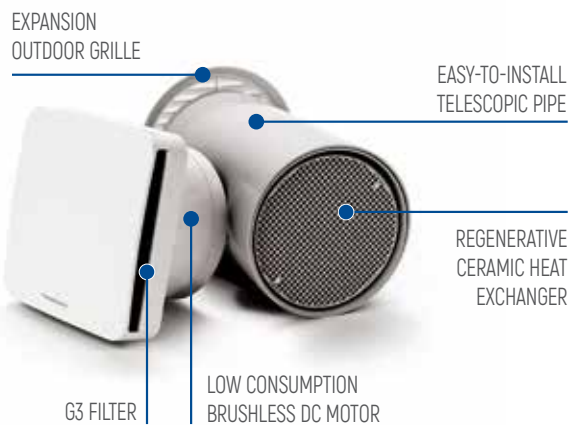

DECENTRALIZED WIRELESS HEAT RECOVERY UNIT

IMPROVE AIR QUALITY

Opening windows is not always enough to really improve the air quality breathed at home.

A specific solution is called ECOCOMFORT PLUS: a ventilation system that ensures a constant clean air renewal, also preventing the formation of moisture and mold and allowing to recover the exhaust heat, considerably reducing the cost of heating and cooling.

IR remote control has been studied and designed to allow a fast system installation set up and an easy-to-use operation.

IR REMOTE CONTROL

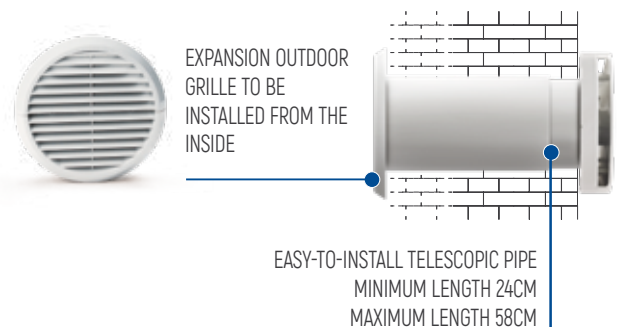

A CAREFREE COMFORT

ECOCOMFORT PLUS is equipped by useful sensors such as temperature, VOC, humidity and brightness, that allow the unit to adopt the most suitable ventilation mode in total autonomy, ensuring the best room comfort.

EASY-TO-INSTALL

ECOCOMFORT PLUS is available in 2 dimensions (100mm and 160mm) and has to be installed on the perimeter wall.

TECHNICAL SPECIFICATIONS

Product code	AP19989	AP19993
Model	ECOCOMFORT PLUS 100	ECOCOMFORT PLUS 160
Ø Pipe	100 mm	160 mm
Power supply	110V ÷ 230V- 50/60Hz	110V ÷ 230V- 50/60Hz
