SMART DECENTRALIZED HEAT RECOVERY SANITATION UNIT, HIGH PERFORMANCE

UNIQUE INNOVATION

RHINOCOMFORT 2 PRO sanitizes the air coming from outside thanks to a unique and innovative technology: it combines the UV-C LED action and the high power UV-A to a photocatalysis process at zero ozone emissions.

RHINOCOMFORT 2 PRO decomposes the harmful substances present in the inlet air, turning them in harmless substances. Besides, the ceramic heat exchanger recovers the heat present in the exhaust air and gives it back to the inlet air when the device reverses the ventilation cycle, acting in complete autonomy.

TOP PERFORMANCE

Fan and motor optimization allows the RHINOCOMFORT 2 PRO to considerably increase the flow rate up to 115 m³/h, with the advantage to correctly ventilate even in big rooms, making it unique in its field.

SMART SENSORS

Thanks to the smart sensors fitted on the device (temperature, relative humidity, brightness, eCO₂ and VOC), the indoor air quality is constantly monitored and managed in automatic mode, ensuring the best room comfort.

A SINGLE APP FOR A COMPLETE COMFORT CONTROL

RHINOCOMFORT 2 PRO has a multi-connectivity system which fits in the *Intelliklima+* app, both in Wi-Fi and by Bluetooth. An actual "hub" where it is also possible to set up all the connected Fantini Cosmi programmable thermostats, as an "integrated" smart home.

TECHNICAL SPECIFICATIONS

Product code	AP19996
Model	RHINOCOMFORT 2 PRO
Ø Pipe	160 mm
Power supply	110V ÷ 230V- 50/60Hz
Flow rate	20 ÷ 115 m ³ /h
